

CEE MARKET EXPANSION AND CHANNEL GROWTH ACCELERATOR

Bridging East and West — Turning Channel Potential into Cross-Regional Growth.

PROBLEM

Central and Eastern Europe (CEE) remains one of EMEA's most dynamic yet complex growth regions. Diverse economies, evolving partner ecosystems, and cultural differences make expansion both promising and difficult. Vendors entering the region from the US, Israel, or Asia often underestimate the differences between Poland, Czech Republic, Hungary, and the Baltics, while CEE-based scale-ups expanding westward face challenges adapting to mature markets like Germany or the Nordics. Without clear focus, localization, and the right partners, great products lose traction and investment goes under-leveraged.

SOLUTION

The CEE Market Expansion and Channel Growth Accelerator helps companies design and execute a fit-for-growth go-to-market plan for entering or scaling from Central and Eastern Europe. Delivered through the Connection2Channel (C2C) framework, this structured six-week engagement combines regional market insight, segmentation, and channel design to create a practical, data-driven roadmap for sustainable cross-regional revenue. **You can expect:**

- Market opportunity & risk mapping
- Partner & channel ecosystem analysis
- Go-to-market & coverage design
- Market segmentation & value proposition review
- International expansion roadmap & execution plan

WHY THIS WORKS

CEE success demands more than translation — it requires understanding local buying patterns, partner maturity, and the realities of doing business across emerging and mature economies. Our structured, data-driven approach identifies where to focus, who to engage, and how to scale efficiently across borders. By combining market segmentation, partner mapping, and clear go-to-market modeling, we deliver an actionable plan that accelerates traction and creates a seamless bridge between local markets and the wider EMEA ecosystem.

OUTCOMES

- ✓ Validated, data-backed expansion plan
- ✓ Clear partner ecosystem and sales coverage model.
- ✓ Tailored go-to-market strategy aligned to regional maturity.
- ✓ Faster traction through localized enablement.
- ✓ Sustainable growth linking CEE with wider EMEA markets.
